Index to Volume 16

Abdomen, catheterization, guide for, 917
ABRAMSON, D. I., 851
Absorption
  intestinal, analogue computer for measurement with tracers, 911
  of iron, measurement with plastic scintillator, 1126
Acceleration
  angular, vestibular reactions during, 215
  effect on pulmonary gas transport, 641
  forward
    heart rate during, 1078
    pulmonary arterial shunting during, 1081
  high, effects on biological systems, 221
  tolerance, hormonal determinants, 211
Accelerometer, three-dimensional, for analyzing body movements, 191
Acclimation: *see also* specific environmental condition
  to adverse environments, metabolic effects of somatotropin, 243
Acetazolamide
  carbonic anhydrase inhibition by, effect on carbon dioxide transport, 1023
  effect on metabolic rate, 367
Acid-base balance
  alterations, citric acid cycle in, 593
  in blood and cerebrospinal fluid, changes during altered ventilation, 1016
Acidosis, respiratory, free fatty acid mobilization during, 339
Action potentials; Activity: *see* Responses
ADAMS, T., 226
ADOLPH, E. F., 819, 827
Adrenal gland, catecholamines, in *Escherichia coli* endotoxin shock, 348
Adrenalectomy and cold exposure, effects on heat production and loss, 127
Age
  adults, lungs and thorax, volume-pressure relationships, 1034
  and arteriosclerosis, effects on plasma fibrinogen, 660
  and erythrocyte agglutinability, in Hiroshima subjects, 1093
  children, body surface area, determination of, 969
  effects of, in experimental hypoxemia, 639
  newborn, lungs and thorax, volume-pressure relationships, 1034
  trends, in fat, in normal and obese children, 173
Agglutinability, erythrocyte, in Hiroshima subjects, age-related changes, 1093
AGOSTONI, E., 1055
Air
  respiratory, flow in trachea, 1060
  shock waves, transmission of elastic disturbances caused by, 426
  subglottic pressure, and neural stimulation in phonation, 1142
Airway: *see* Respiratory system
AKUTSU, T., 381
ALDRICH, F. D., 197
Alkalosis, respiratory, relation to hypokalemia during anesthesia and altitude stress, 837
ALLISTON, C. W., 253
ALLWOOD, M. J., 541
Altitude
  effects on
    basal metabolic rate and body composition, 431
    body composition, 589
    coronary lipid deposition, 103
    endurance running, 435
  stress, respiratory alkalosis during, relation to hypokalemia, 837
  tolerance, of chickens and pigeons, 141
ALTLAND, P. D., 141
Alveolar gases: *see* Gases
Alveolar processes: *see* Lungs
Amines, catechol: *see* Catecholamines
Ammonia, influence on respiration, 703
Amobarbital, effect on dark adaptation, 361
Analogue computer, for measuring intestinal absorption rates with tracers, 911
ANDRUS, S. B., 103
Anemia, chronic, coronary lipid deposition during, 103
Anesthesia
  and altitude stress, respiratory alkalosis during, relation to hypokalemia, 837
  and endocrine gland blood flow, 763
  cardiorespiratory parameters, 45
  chemomyelotomy, as substitute for, in experimental surgery, 386
  nitrous oxide excretion during, 720
  oxygen inhalation during, cardiovascular response, 858
  pulmonary diffusing capacity during, 499
Anoxia
  corpuscular hemoglobin concentration during, 847
  effect on blood flow and oxygen uptake, 851
Anthropometric measurement
  of body build, quantitative assessment, 960
  of body weight, fractionation, 949
  of muscular and obese men, comparison, 955
ANZALONE, A. J., 463
Aorta
  blood pressure and diameter, relation, 545
  mechanics, 293
Apparatus
  accelerometer, three-dimensional, for analyzing body movements, 191
  analogue computer, for measuring intestinal absorption rates with tracers, 911
  ballistocardiograph, hydrostatic air-bearing, 755
  blood level indicator, electronic, 925
  "bowel-window," for collection of urine after ureterosigmoidostomy in dogs, 752
  burette, continuous recording, 201
  calorimetry, in estimation of heat flow from hands, 617
  cardiotachometer, miniaturized, for multiple applications, 902
  catheter, abdominal, guide for, 917
  dye-cuvette, linear, for direct recording, 207
  dynamometer, electronic, for determining human isometric strength, 388
  electrode
    extraluminal, for recording action potentials of ureter, 933
    low-mass, for bioelectric recording, 939
    small, for oxygen, 192
  flowmeter, electromagnetic
    for phase detection, 197
    transistorized, 940
    trapezoidal-wave, 566
  for continuous recording of arterial blood pO_2 in vivo, 1129
  for continuous recording of arterial pO_2, pCO_2, pH, and O_2 saturation in vivo, 896
  for electrometric determination of CO_2 tension in blood and gases, 919
  for establishing zero reference level for blood pressure measurement on dogs, 947
  for measuring and classifying odors, 742
  for measuring oxygen consumption of small animals, 923
  for measuring uneven ventilation, closed circuit method, 1109
  for measuring $\dot{V}_{O_2}$ and $\dot{V}_{CO_2}$ of small sea animals, 768
  for production of microelectrodes, 385
  for quantitation of spontaneous movements of animals given psychotropic drugs, 390
  for recording intramuscular pressure in human myometrium, 573
  for studying salivary conditional reflex in man, 740
  for studying subglottic air pressure and neural stimulation in phonation, 1142
  for telemetering of ventricular circumference in dogs, 1124
  for temperature control in hypothermia, 937
  for transfer and storage of small volumes of gas for Scholander analyzer, 578
  freezing, for preservation of bone marrow, 767
  gas chromatographic: *see* Chromatography
  integrator, automatic resetting, for physiologic use, 914

Apparatus—*cont.*
manometer, for low-volume displacement, 758
spectrometer, mass, for measuring blood gas tension, 562
metabolism, for small animal, 387
microelectrode
for determining dissolved oxygen in tissue, 729
pneumatic instrument for production of, 385
microrespirometer, multiple-unit, constant-pressure, 944
nomogram, for pCO_2 determination when blood temperature is different from 37 C, 909
oscillator, relaxation, for tissue stimulation, 205
plethysmograph
aluminum, 391
for study of cardiopulmonary physiology, 935
venous occlusion, evaluation of, 289
pneumotachometer, 380
polarograph, oxygen, vacuum tube, 393
pulse rate meter, 378
Q meter, for measuring frequency specificity of cortical reactivity to electrical stimulation, 750
respiratory head mask for dogs, 1139
scintillator, plastic, for measurement of iron absorption in rats, 1126
tank, for obtaining transmembrane potential curves in vivo, 580
test circulation, without suction, for artificial heart valves, 906
Arginine vasopressin, H^3- or I^{131}-labeled, role in disappearance of plasma radioactivity, 1097
Armstrong, G. G., Jr., 387, 947
Arrest, cardiac: *see* Heart
Arteries
blood pO_2, continuous recording, 1129
occlusion, effect of short periods on blood flow and oxygen uptake, 851
oxygen tension, effect of catecholamines, 1043
pO_2, pCO_2, pH, and O_2 saturation, continuous recording, 896
Arteriography, coronary, as physiologic investigational technique, 878
Arteriosclerosis, and plasma fibrinogen concentration, relation, 660
Arthur, J. D., 257
Artificial heart valves: *see* Heart valves
Artificial resuscitation: *see* Resuscitation
Aspiration
of fluid
effect on ventilation and circulation, 35
lung mechanics and resuscitation after, 684
of sea and fresh water, effect on lungs and incidence of respiratory arrest, 41
Assali, N. S., 1087
Åstrand, P.-O., 971, 977
Atherosclerosis, experimental, in anemia and polycythemia, 103
Atrium: *see* Heart atrium
Attinger, E. O., 469
Auchincloss, J. H., Jr., 21
Avery, M. E., 1034
Axelrod, D. R., 709
Ayres, S. M., 371

Bailie, M. D., 107
Bain, T., 465
Baker, P. T., 421
Ballistocardiograph: *see* Apparatus
Banerjee, S., 164, 969
Barnett, G. O., 545
Barry, J. Q., 837
Barua, A., 164
Basal metabolic rate: *see* Metabolism
Basmajian, J. V., 386
Bass, D. E., 624
Bates, D. V., 30
Bedell, G. N., 928
Behnke, A. R., 949, 955, 960
Behnke, R. H., 1047
Belding, H. S., 647
Bell, Y., 851
Berengo, A., 522
Berlin, N. I., 181
Bernthal, T., 842
Bevan, J. A., 858
Bhattacharya, A. K., 969
Bile secretion, effects of hexamethonium and dietary factors, 810
Bilirubin clearance, in estimation of erythrocyte life span, 1140
Bioelectric recording, low-mass electrode for, 939
Biological system, effects of high acceleration, 221
Birkhead, N. C., 153
Bishop, J. M., 511
Blackwell, L., 925
Blair, D. A., 119
Bloch, J. H., 181
Blood: *see also* anatomical location
acid-base changes: *see* Acid-base balance
cells: *see* specific type of cell or anatomical location
circulation: *see* Circulation
coagulation, product I generation, interaction with platelets and phospholipids, 112
constituents: *see* specific constituent
distribution, during hypothermia-induced cardiac arrest, 538
flow
effect of muscle strength and endurance development, 873
effect of short periods of arterial occlusion, 851
of endocrine glands, 762
peripheral, in circulatory impairment, 61
regional, response to oxytocin in pregnancy, 1087
flowmeter: *see under* Apparatus
gases: *see* Gases, or specific gas
level, electronic indicator, 925
optical density, effects of injection of clear media, 669
platelets, and coagulation product I, interaction, 112
pressure: *see also* Pressure
low volume displacement manometer, 758
measurements, device for establishing zero reference level, 947
volume
anatomic distribution of induced changes, evaluation by regional weighing, 85
"central," measurement, 541
Blood vessels: *see also* name or type of vessel or anatomical location
digital, distensibility in cold, 257
resistance, response to oxytocin in pregnancy, 1087
responses to regional heating of body surface, 1006
Blount, S. G., Jr., 276, 279, 283
Boblitt, D. E., 878
Body build, quantitative assessment, 960
Body composition
and basal metabolic rate, at high altitude, 431
at sea level and high altitudes, 589
during caloric restriction in cold, 624
Body energy: *see* Energy
Body movements
effect on function of leg muscles acting on foot, 597
passive, respiratory consequences, 30
three-directional accelerometer for analysis of, 191
Body position, posture
effect on lung volumes, 27
standing, cardiac output response to, 283
Body surface
area, determination in Hindu children, 969
regional heating: *see* Temperature, body
Body weight: *see also* Obesity
anthropometric fractionation, 949
gains, effects of handling, 587
loss, during caloric restriction in cold, 624
regional, in evaluation of induced changes in blood volume anatomic distribution, 85
Bogdonoff, M. D., 342
Bolie, V. W., 783
Bondurant, S., 1075
Bone, tensile strength, 355
Bone marrow, freezing apparatus for preservation of, 767
Bouhuys, A., 1039
Bowel: *see* Intestinal tract
Bowen, J. F., 703
Brain, oxygen of, during hypothermia, 827
Bramante, P. O., 982
Breathing: *see also* Respiration
and respiratory control, in obese subjects, 21
cycle, thoracoabdominal mechanics during, graphical analysis, 1055
during pulmonary embolism, 842
dynamic resistance to, measurement of, 463
in deep hypothermia, 819
negative pressure, pulmonary venous admixture during, 1047
oxygen, effects before and after exercise, 48
pattern, changes, and lung N_2 clearance, 1039

positive-pressure, effect on pulmonary hemodynamics, 641
regulation, influence of cerebral activity in wakefulness, 15
single-breath analysis of carbon dioxide concentration records, 522
BREDING, H., 923
Bridge solutions, pH differences of blood and plasma observed with, 576
Bronchi, pulsatile gas flow, caused by heart beat, 697
Bronchial segments, volume-pressure and length-tension measurements, 170
BROUHA, L., 133
BULLARD, R. W., 633
Burette, continuous recording, 201
BURGEN, A. S. V., 911
BYON, Y. K., 827
BYRNE, J. J., 469

CACERES, C. A., 300
CAHILL, J. M., 469
CAIN, S. M., 1023
CALATAYUD, J., 300
Calcium
and organic acids, in hyperventilation, 709
serum, ultrafiltrable and ionic, effects of citrate, 1103
CALDEYRO-BARCIA, R., 573
Calf, cutaneous vasodilatation, elicited by body heating, 655
Caloric restriction: *see* Diet
Calorimetry, in estimation of heat flow from hands, 617
Cannulation, of parotid salivary duct, technique, 203
Carbohydrates, cerebral metabolism, in mental disease, 175
Carbon dioxide
arterial pressure, continuous recording, 896
concentration records, single-breath analysis, 522
effects during cold exposure, 633
inhalation, by SCUBA divers, ventilatory response, 8
pressure, nomogram for determination of when blood temperature is not 37 C, 909
tension
and H^+, as factors in respiratory and cerebral circulatory control, 473
and oxygen tension, effect of interaction in producing convulsions and death, 1
in blood and gases, electrometric determination, 919
of mixed venous blood, role in respiratory control, 1029
total, pCO_2, and pH in spinal fluid, 485
transport, during inhibition of carbonic anhydrase, 1023
$\dot{V}_{CO_2}$ measurement in small sea animals, 768
Carbon monoxide, steady state diffusing capacity, in females, 839
Carbonic anhydrase inhibition, carbon dioxide transport during, 1023
Cardiac processes: *see* Heart
Cardiopulmonary system, plethysmograph for study of, 935
Cardiorespiratory parameters, in anesthesia, 45
Cardiorespiratory system, responses during prolonged exercise, 997
Cardiotachometer, miniaturized, 902
Cardiovascular system
responses to heat stress, 869
responses to oxygen inhalation during anesthesia, 858
CASTILLO, C. A., 207
Catecholamines
adrenal, in *Escherichia coli* endotoxin shock, 348
effect on arterial oxygen tension, 1043
Catheterization, abdominal, guide for, 917
Catheters, coronary sinus, prolonged maintenance for study of myocardial metabolism, 209
CAVAGNA, G., 191
Cells: *see* type of cell or anatomical location
Cerebral cortex, reactivity to electrical stimulation, Q meter for measurement of, 750
Cerebrospinal fluid, acid-base changes during altered ventilation, 1016
Cerebrum
activity in wakefulness, influence on regulation of breathing, 15
blood flow and metabolism, validity of internal jugular blood for study of, 313
carbohydrate metabolism, in mental disease, 175
circulatory control, H^+ and pCO_2 as factors, 473
decarboxylase for 5-hydroxytryptophane, 1050
CHARLTON, G., 729
Cheek, cutaneous vasodilatation elicited by body heating, 655
Chemomyelotomy, as substitute for general anesthesia, in experimental surgery, 386
CHERNIACK, N. S., 641
Chest, irradiation, effects on pulmonary function, 331
Children: *see under* Age
CHIN, D. S., 810
CHINARD, F. P., 831
Chlorothiazide, effects on forearm vascular responses to norepinephrine, 549
CHO, M. H., 390
CHRISTENSEN, M., 655
Chromatography, gas
adsorption technique, for analysis of blood gases, 374
in determination of blood oxygen content, 371
range selector to improve peak height measurement, 571
Cigarette smoke, inhalation: *see* Smoking
Circulation: *see also* specific anatomical location or system
and ventilation, after fluid aspiration, 35
changes during mild supine exercise, 279
response to ventilatory obstruction during steady-state exercise, 309
restoration, after fresh water drowning, 1071
Circulatory system, impairment, peripheral blood flow fluctuation in, 61
CISZCZON, W. J., 940
Citrate, effect on serum ultrafilterable and ionic calcium, 1103
Citric acid cycle, in alterations of acid-base balance, 593
CLEMEDSON, C.-J., 426
CLEMENTS, J. A., 444
Climatic stress, effect on nutrition, 611
CLOSE, D., 48
Closed circuit method for measuring uneven ventilation, 1109
Coagulation, product I generation, interaction with platelets and phospholipids, 112
COHN, J. E., 935
Cold acclimatization, exposure: *see under* Temperature, environmental
COLEBATCH, H. J. H., 35, 45, 684
COLEMAN, R. F., 355
Colloidal gold: *see* Gold
COMROE, J. H., JR., 713, 1029
Computer, analogue, for measurement of intestinal absorption rates with tracers, 911
CONN, H. L., JR., 1065
CONRAD, M. C., 289
Consciousness, loss of, during underwater swimming, 583
Convulsions, effects of increased pO_2 and pCO_2, 1
COOK, C. D., 170, 1034
COOPER, T., 940
COPE, C., 917
COPPEN, A. J., 367
Coronary artery
arteriography, as physiological investigational technique, 878
blood flow, in measurement of left ventricular heat production, 883
lipid deposition, during anemia or high altitude exposure, 103
Coronary sinus catheters, prolonged maintenance for study of myocardial metabolism, 209
Corpuscles, hemoglobin concentration, in anoxic lung disease, 847
COTLOVE, E., 764
COZINE, R. A., 1071
CRAIG, A. B., JR., 463, 583
CRISE, J. R., 633
CRISMON, J. M., 1103
CROPP, G. J. A., 1029
CROTEAU, J. R., 170
CROWELL, J. W., 387
CUNNINGHAM, D. M., 755
Cutaneous processes: *see* Skin
CUTILLO, A., 522

DAHL, L. K., 1097
DAHNKE, J., 393
DANIELS, F., JR., 421
Dark adaptation, effect of amobarbital, 361
DAVIS, T. R. A., 231, 1011
Death, effects of increased pO_2 and pCO_2, 1
DEAVERS, S., 250
DEBONS, A. F., 1097
Decarboxylase, cerebral, for 5-hydroxytryptophane, 1050

Decompression chamber-plethysmograph, aluminum, 391
DEKKER, E., 1060
DE LANNE, R., 133
DEMPSTER, W. T., 355
Diabetes, blood glucose replacement rates, 789
Diet: *see also* Nutrition
  caloric restriction in cold, effect on composition and caloric density of weight loss, 624
  effect on body temperature during sleep in cold, 239
  effect on pancreatic and bile secretion, 810
Diffusing capacity, pulmonary: *see* Lungs
Digestion, effect of environmental temperature and humidity, 611
Digits
  blood vessels, distensibility in cold, 257
  vascular reactivity, prednisone effects, 89
Diving: *see* Swimming, underwater
DIXON, M. E., 30
DOTY, V., 374
DOWER, G. E., 580
Drowning, fresh water, circulation restoration, 1071
Dye: *see also* Indicator
Dye-cuvette, linear, for direct recording, 207
Dye-dilution curves, produced by injection of transparent solutions, 669
Dynamometer: *see* Apparatus

Ear, cutaneous vasodilatation, elicited by body heating, 655
Eccrine gland sweating, epinephrine-induced, 652
ECKSTEIN, J. W., 271, 549
EGLI, G. E., 253
EITZMAN, D. D., 627
Elastic disturbances from air shock waves, transmission of, 426
ELBEL, E. R., 48
Electrical activity: *see under* Responses; Stimulation
Electrodes: *see* Apparatus
Electrolytes, of tissue, in heart preparation, 95
Electrometric technique, for determination of CO_2 tensions in blood and gases, 919
Electronic blood level indicator, 925
Electronic dynamometer: *see* Apparatus

Contents of Volume 16

No. 1. JANUARY 1961

Interactions of increased pO_2 and pCO_2 effects in producing convulsions and death in mice. *Marshall, J. R., and C. J. Lambertsen* ... 1

Ventilatory response of SCUBA divers to CO_2 inhalations. *Froeb, H. F.* ... 8

Transient effect of sudden mild hypoxia on respiration. *Hornbein, T. F., A. Roos, and Z. J. Griffo* ... 11

Influence of cerebral activity in wakefulness on regulation of breathing. *Fink, B. R.* ... 15

Respiratory control and work of breathing in obese subjects. *Gilbert, R., J. H. Sipple, and J. H. Auchincloss, Jr.* ... 21

Effect of body posture on lung volumes. *Moreno, F., and H. A. Lyons* ... 27

Respiratory consequences of passive body movement. *Dixon, M. E., P. B. Stewart, F. C. Mills, C. J. Varvis, and D. V. Bates* ... 30

Ventilation and circulation after fluid aspiration. *Halmagyi, D. F. J., and H. J. H. Colebatch* ... 35

Lung changes and incidence of respiratory arrest in rats after aspiration of sea and fresh water. *Halmagyi, D. F. J.* ... 41

Some cardiorespiratory parameters in anesthetized sheep. *Halmagyi, D. F. J., and H. J. H. Colebatch* ... 45

Some effects of breathing oxygen before and after exercise. *Elbel, E. R., D. Ormond, and D. Close* ... 48

Unilateral hypoventilation produced in dogs by occluding one pulmonary artery. *Severinghaus, J. W., E. W. Swenson, T. N. Finley, M. T. Lategola, and J. Williams* ... 53

Fluctuation of peripheral blood flow in subjects with circulatory impairment. *Franke, E.K.* ... 61

Effect of lung inflation on static pressure-volume characteristics of pulmonary vessels. *Permutt, S., J. B. L. Howell, D. F. Proctor, and R. L. Riley* ... 64

Effect of inflation of the lung on different parts of pulmonary vascular bed. *Howell, J. B. L., S. Permutt, D. F. Proctor, and R. L. Riley* ... 71

Pulmonary vascular resistance as determined by lung inflation and vascular pressures. *Roos, A., L. J. Thomas, Jr., E. L. Nagel, and D. C. Prommas* ... 77

Anatomic distribution of induced changes in blood volume, evaluated by regional weighing. *Fell, C., and R. F. Rushmer* ... 85

Effect of prednisone on digital vascular reactivity in normotensive and hypertensive subjects. *Mendlowitz, M., N. Naftchi, H. L. Weinreb, and S. E. Gitlow* ... 89

Tissue water and electrolytes in an isolated perfused rat's heart preparation. *Taylor, I. M., W. D. Huffines, and D. T. Young* ... 95

Coronary lipid deposition during chronic anemia or high altitude exposure. *Fillios, L. C., S. B. Andrus, and C. Naito* ... 103

Effects of exercise on heart output of the dog. *Bailie, M. D., S. Robinson, H. H. Rostorfer, and J. L. Newton* ... 107

Generation of coagulation product I and its interaction with platelets and phospholipids. *Horowitz, H. I., and T. H. Spaet* ... 112

Association of an inhibitor with deficiency of plasma-clearing activity. *Koppel, J. L., L. V. Novak, and J. H. Olwin* ... 115

Cutaneous vasomotor nerves to the head and trunk. *Blair, D. A., W. E. Glover, and I. C. Roddie* ... 119

Effects of somatotropin in rats acutely exposed to adverse environments. *Hale, H. B., and R. B. Mefferd, Jr.* ... 123

Effect of hypothyroidism on heat production and loss during acute exposure to cold. *Fregly, M. J., P. F. Iampietro, and A. B. Otis* ... 127

Physiological reactions of men and women during muscular activity and recovery in various environments. *Brouha, L., P. E. Smith, Jr., R. De Lanne, and M. E. Maxfield* ... 133

Altitude tolerance of chickens and pigeons. *Altland, P. D.* ... 141

A unified system for evaluation and selection of heat stress candidates. *Gold, J.* ... 144

Assessment of physical work capacity. *Hettinger, T., N. C. Birkhead, S. M. Horvath, B. Issekutz, and K. Rodahl* ... 153

Some factors modifying the expression of human strength. *Ikai, M., and A. H. Steinhaus* ... 157

Energy metabolism in college girls. *Banerjee, S., A. Barua, and A. Ghosh* ... 164

Effect of training on physical fitness of women students. *Sloan, A. W.* ... 167

Volume-pressure and length-tension measurements in human tracheal and bronchial segments. *Croteau, J. R., and C. D. Cook* ... 170

Age trends in fat in normal and obese children. *Pařízková, J.* ... 173

Cerebral metabolism of glucose-3-C^{14}, pyruvate-1-C^{14} and lactate-1-C^{14} in mental disease. *Sacks, W.* ... 175

Water exchange in animal and human tumors. *Bloch, J. H., F. K. Millar, A. R. Harris, N. I. Berlin, and J. White* ... 181

An improved heart-lung preparation ventilated by negative pressure. *Sheehan, W. L., W. B. Kinzie, K. L. Westbrook, W. A. Spencer, and H. E. Hoff* ... 186

SPECIAL COMMUNICATIONS

A three-directional accelerometer for analyzing body movements. *Cavagna, G., F. Saibene, and R. Margaria* ... 191

A simple small oxygen electrode. *Staub, N. C.* ... 192

Urine specific gravity and osmolality in inbred strains of mice. *Silverstein, E.* ... 194

Improved electromagnetic flowmeter; phase detection, a new principle. *Olmsted, F., and F. D. Aldrich* ... 197

A simple continuous recording burette. *Sunahara, F. A.* ... 201

Technique for cannulation of parotid salivary duct of sheep. *Stewart, W. E., and D. G. Stewart* ... 203

A relaxation oscillator for tissue stimulation. *Monroe, R. G., and G. N. French* ... 205

A simple linear dye-cuvette for direct recording. *Castillo, C. A., W. C. Zarnstorff, and W. E. Gilson* ... 207

Prolonged maintenance of coronary sinus catheters in dogs for study of myocardial metabolism. *Galla, S. J., A. W. R. Williamson, and L. D. Vandam* ... 209

No. 2. MARCH 1961

Hormonal determinants of mammalian tolerance to acceleration stress. *Polvis, B. D.* ... 211

Vestibular reactions during prolonged constant angular acceleration. *Guedry, F. E., and L. S. Lauver* ... 215

Effects of relatively high accelerations on some biological systems. *Slonim, A. R.* 221

Relation of changing levels of physical fitness to human cold acclimatization. *Heberling, E. J., and T. Adams* 226

Seasonal acclimatization to cold in man. *Davis, T. R. A., and D. R. Johnston* 231

Body cooling and response to heat. *Veghte, J. H., and P. Webb* 235

Effect of diet on body temperature during sleep in the cold. *Kreider, M. B.* 239

Metabolic effects of somatotropin in rats acclimated to adverse environments. *Hale, H. B., and R. B. Mefferd, Jr.* 243

Magnesium in blood and tissues during cold acclimation. *Neubeiser, R. E., W. S. Platner, and J. L. Shields* 247

Potassium distribution and toxicity in hypothermia. *Hoff, H. E., S. Deavers, and R. A. Huggins* 250

Loss of potential young in the ewe due to high ambient temperature. *Alliston, C. W., G. E. Egli, and L. C. Ulberg* 253

Distensibility of digital blood vessels in cold environment. *Hyman, C., J. D. Arthur, A. D. Trotter, Jr., P. C. Humphreys, Jr., and T. Winsor* 257

Effect of varying indicator injection sites on values for cardiac output. *Gunnells, J. C., and R. Gorten* 261

Isotope external counting method for cardiac output analyzed in glass model circulation. *Gorten, R., and J. C. Gunnells* 266

Cardiac output measured by thermal dilution of room temperature injectate. *Evonuk, E., C. J. Imig, W. Greenfield, and J. W. Eckstein* 271

Cardiac output in normal resting man. *Reeves, J. T., R. F. Grover, G. F. Filley, and S. G. Blount, Jr.* 276

Circulatory changes in man during mild supine exercise. *Reeves, J. T., R. F. Grover, G. F. Filley, and S. G. Blount, Jr.* 279

Cardiac output response to standing and treadmill walking. *Reeves, J. T., R. F. Grover, S. G. Blount, Jr., and G. F. Filley* 283

Evaluation of venous occlusion plethysmograph. *Conrad, M. C., and H. D. Green* 289

Aortic mechanics in the living dog. *Patel, D. J., A. J. Mallos, and D. L. Fry* 293

High-frequency atrial electrical activity. *Caceres, C. A., G. A. Kelser, Jr., and J. Calatayud* 300

Physiological alterations in increased pulmonary blood flow with and without pulmonary hypertension. *Ellison, L. T., D. P. Hall, T. Yeh, H. Mobarhan, J. Rossi, and R. G. Ellison* 305

Circulatory response to ventilatory obstruction during steady-state exercise. *Levy, A. M., J. S. Hanson, and B. S. Tabakin* 309

Validity of internal jugular blood for study of cerebral blood flow and metabolism. *Lassen, N. A., and M. H. Lane* 313

Tritium used for estimation of right-to-left shunts. *Lassen, N. A., K. Mellemgaard, and J. Georg* 321

Extrathoracic airway resistance in man. *Hyatt, R. E., and R. E. Wilcox* 326

Effects of irradiation of chest on pulmonary function in man. *Emirgil, C., and H. O. Heinemann* 331

Mobilization of free fatty acids in dogs during respiratory acidosis. *McElroy, W. T., Jr., and J. J. Spitzer* 339

Effect of norepinephrine on plasma free fatty acids level in man. *Klein, R. F., E. H. Estes, Jr., and M. D. Bogdonoff* 342

Steroid pyrogen studies in laboratory and domestic animals. *Palmer, R. H., B. Ratkovits, and A. Kappas* 345

Adrenal catecholamines in E. coli endotoxin shock. *Nykiel, F., and V. V. Glaviano* 348

Utilization of body energy reserves during work in dogs. *Young, D. R., and R. Price* 351

Tensile strength of bone along and across the grain. *Dempster, W. T., and R. F. Coleman* 355

Effect of amobarbital on the course of human dark adaptation. *Granger, G. W.* 361

Effect of acetazolamide on metabolic rate of man. *Coppen, A. J., and A. G. Mezey* 367

Chronic thoracic duct-esophageal shunt preparation in protein studies. *Kolmen, S. N.* 369

SPECIAL COMMUNICATIONS

Determination of blood oxygen content by gas chromatography. *Lukas, D. S., and S. M. Ayres* 371

Analysis of blood gases with gas adsorption chromatographic technique. *Wilson, R. H., B. Jay, V. Doty, H. Pingree, and E. Higgins* 374

A new pulse rate meter for experimental and clinical use. *Nakayama, T., M. Kobayashi, and K. Takagi* 378

Inexpensive pneumotachometer (PTM). *Ross, S. M., and F. F. Kao* 380

Intracardiac thrombosis on plastics in relation to construction of artificial valves. *Mirkovitch, V., T. Akutsu, and W. J. Kolff* 381

A pneumatic instrument for production of microelectrodes. *Vierhout, R. R.* 385

Chemomyelotomy: substitute for general anesthesia in experimental surgery. *Basmajian, J. V., and D. A. Ranney* 386

Small animal metabolism apparatus. *Armstrong, G. G., Jr., A. C. Guyton, and J. W. Crowell* 387

Electronic dynamometer for determination of human isometric strength. *Hislop, H. J., G. R. Walters, and H. M. Hines* 388

Quantitation of spontaneous movements of animals given psychotropic drugs. *Cho, M. H.* 390

Aluminum decompression chamber and body plethysmograph. *Rigatto, M., and A. P. Fishman* 391

A vacuum tube oxygen polarograph. *Dahnke, J., G. I. Johnston, M. E. O'Reilly, and A. Starr* 393

Method for simultaneous quantitative estimation of intracranial contents. *Rosomoff, H. L.* 395

No. 3. MAY 1961

Stability of basal metabolic rate on a polar expedition. *Lewis, H. E., J. P. Masterton, and S. Rosenbaum* 397

Thermal and metabolic responses of men in the Antarctic to a standard cold stress. *Milan, F. A., R. W. Elsner, and K. Rodahl* 401

Prediction of skin temperature of men in the cold. *Iampietro, P. F.* 405

Some physiological changes accompanying tetany induced by exposure to hot, wet conditions. *Iampietro, P. F., M. Mager, and E. B. Green* 409

Some physiological responses of man to workload and environment. *Suggs, C. W., and W. E. Splinter* 413

Relationship between body fat and shivering in air at 15 C. *Daniels, F., Jr., and P. T. Baker* 421

Transmission of elastic disturbances caused by air shock waves in a living body. *Clemedson, C-J., and A. Jönsson* 426

Basal metabolic rate and body composition at high altitudes. *Picón-Reátegui, E.* 431

Effect of altitude on endurance running of *Peromyscus maniculatus*. *Hock, R. J.* 435

Respiratory impedance and volume flow at high frequency in dogs. *Hull, W. E., and E. C. Long* 439

Pulmonary surface tension and alveolar stability. *Clements, J. A., R. F. Hustead, R. P. Johnson, and I. Gribetz* 444

Effect of negative-pressure inflation of the lung on pulmonary vascular resistance. *Thomas, L. J., Jr., Z. J. Griffo, and A. Roos* 451

Relation between alveolar surface tension and pulmonary vascular resistance. *Thomas, L. J., Jr., A. Roos, and Z. J. Griffo* 457

Measurement of dynamic resistance to breathing in unanesthetized dogs. *McIlreath, F. J., Jr., A. B. Craig, Jr., and A. J. Anzalone* 463

Elevation gradient of intrathoracic pressure. *Krueger, J. J., T. Bain, and J. L. Patterson, Jr.* 465

Ventilatory responses to embolization of lung. *Cahill, J. M., E. O. Attinger, and J. J. Byrne* 469

H^+ and pCO_2 as chemical factors in respiratory and cerebral circulatory control. *Lambertsen, C. J., S. J. G. Semple, M. G. Smyth, and R. Gelfand* 473

Total CO_2, P_{CO_2}, and pH in human spinal fluid. *Merril, C. R., H. W. Seipp, and P. C. Luchsinger* 485

Gas exchange after autologous pulmonary embolism in dogs. *Stein, M., C. E. Forkner, Jr., E. D. Robin, and S. Wessler* 488

Unequal distribution of pulmonary diffusing capacity and the alveolar-arterial P_{O_2} differences: theory. *Piiper, J.* 493

Unequal distribution of pulmonary diffusing capacity in the anesthetized dog. *Piiper, J., P. Haab, and H. Rahn* 499

Variations of ventilation and diffusing capacity to perfusion determining the alveolar-arterial O_2 difference: theory. *Piiper, J.* 507

Velocity of O_2 uptake by human red blood cells. *Staub, N. C., J. M. Bishop, and R. E. Forster* 511

Pressure-volume relations of lung and thoracic cage in pulmonary emphysema. *Ting, E. Y., and H. A. Lyons* 517

Single-breath analysis of carbon dioxide concentration records. *Berengo, A., and A. Cutillo* 522

Equation for inert gas exchange which treats ventilation as cyclic. *Riggs, D. S., and A. Goldstein* 531

Blood distribution during cardiac arrest induced by hypothermia. *Willard, F. W., and S. M. Horvath* 538

Measurement of cardiac output and "central" blood volume by various systems. *Marshall, R. J., M. J. Allwood, E. W. O. Keck, and J. T. Shepherd* 541

Relationship of aortic pressure and diameter in the dog. *Barnett, G. O., A. J. Mallos, and A. Shapiro* 545

Effects of chlorothiazide on forearm vascular responses to norepinephrine. *Feisal, K. A., J. W. Eckstein, A. W. Horsley, and H. H. Keasling* 549

Urinary excretion of hippuric acid by man. *Wu, H., and H. C. Elliott, Jr.* 553

Red cell and plasma volumes of the rat and of tissues during cold acclimation. *Everett, N. B., and L. Matson* 557
